.....
 The multi-chambered construction, vinyl's natural insulating characteristics and fusion welded construction combine to produce a window that is strong durable and energy efficient. The material is extruded with the color throughout which means that scratches will barely be noticeable.

OUR PARTNERS

Glass Ops Windows select the best of regional suppliers to partner with in creating a window that combines the highest industry standards in one product.

Frame and sash extrusions come from VEKA, a worldwide leader in window profile and custom vinyl extruding. VEKA's vast product line gives Glass Ops Windows unlimited solutions to your window and door needs. For more information go to: www.vekainc.com

.....
 Inside every Glass Ops double hung window you'll find a variety of advanced of design features that ensure you're getting one of the most structurally sound, energy efficient and easy to operate windows available today.

As a finishing touch, we fabricate our own screens at Glass Ops. We use high-quality, color-matched aluminum rails and fiberglass mesh as the means for ventilation and insect control. Available in half screen or full screen, which allows upper sash ventilation while providing a more pleasing curb appeal look.

- Limited Lifetime Warranty covers repair or replacement of components and insulated glass units for as long as you own your home. Full details of the warranty are available online at tex-starwindows.com
- Proper installation of your new windows will ensure years of trouble-free use and maximum energy savings. Glass Ops Windows strongly recommends the use of a certified master installer.

.....
 Whether you need a new storefront for the building you've always dreamed of, replacing old windows with the best around, adding a vestibule, replacing that old shower door, or just need mirrors for a restroom, Glass Ops has it all.

Insulated glass units are from Cardinal IG in Waxahachie, Texas. Cardinal's patented spacer system and dual-seal technology create superior insulated units which have an almost zero failure rate.

Truth hardware is self-latching and meets or exceeds the industries toughest forced entry standards.

LoE3-366® Glass A New Standard

Cardinal introduces LoE³-366® (pronounced low E cubed-366), the ultimate performance glass. It just might make all other low-E glasses obsolete. LoE³-366® delivers the ideal balance of solar control and high visibility. And it provides the highest levels of year-round comfort and energy savings, making it the perfect glass no matter where you live. The secret? An unprecedented triple layer of silver. This is beyond ordinary low-E glass; LoE³-366® sets the new standard.

Energy savings all year long

The full-year benefits of LoE³-366® can be clearly seen. When the temperature soars in the summer, ordinary window glass just can't beat the heat. And tinted glass spoils the view. LoE³-366® is formulated to reject solar heat while maintaining attractive visibility. It keeps the heat out while letting light in. As a matter of fact, LoE³-366® glass is our ultimate in performance and clarity among all of Cardinal's clear coated products.

.....
Fusion-welded construction combined with a thermally efficient design and insulating glass package create a window that performs as well as it looks.

Some typical geometric shapes and mulling options. Options are not limited to examples shown here. Contact your Glass Ops sales representative for complete product offerings.

Energy Star Climate Map gives you clear guidelines for determining which windows and doors will do the best job to help reduce heating and cooling costs in your region and your home.
